Andrzej Rybka  
What lessons can be learned  
from Poland and Aviation Valley?

# > BREAKING DOWN BARRIERS TO GLOBAL COLLABORATION: Aviation and Aerospace Australia 2050

## How do we lead our industry to success?

Through collaboration and partnerships both domestically and globally.

Join our MoC partners and international guests from Singapore, Canada, Brazil, Poland and more locations to discuss positioning the Australian Aviation and Aerospace for the future. Investigate breaking down barriers to international co-operation and trade by talking to experts. How do the economic forecasts influence your planning? Use international locations as your launching pad, look at population and city growth to determine the future of travel. What is required next in the drone sector? Cyber security, digitalisation and big data are not just on the horizon but they have arrived! Keep up with the trends and stay ahead of the curve. In an extremely busy week, join us for an afternoon in a fantastic environment to make meaningful connections and thought provoking conversation and discussion.

Adam Burford  
**Chairman**  
**Aviation/Aerospace Australia**
